OVERVIEW

TERRAFLEX™ is a true blue NON metal polyurethane horseshoe. The material is known for its high performance properties such as abrasion resistance, tear resistance, slip resistance, durability, flexibility, load bearing and concussion absorbing capabilities far superior than plastic, rubber or metal. They are well tested with thousands of competition miles. They allow the hoof to function in a more natural state whilst still receiving all of the protective benefits that a horse shoe provides. www.bluepegasos.com.au/Farrier|Trimmer Supplies|Products
