OVERVIEW

PEMF therapy is widely used in conditioning horses at race tracks, reining and dressage barns and events.By using PEMF you reduce inflammation, reduce injections, hardening of muscles, reduce incidents of torn muscles, ligaments and tendons.PEMF therapy is very effective in getting to deep muscle soreness and damage (damage, stifles, etc.), increasing range of motion, while reducing pain with no adverse reactions.Call for our facility demonstration program.Health Care Products|Resources|Alternative|Integrative Medicine>Products
