OVERVIEW

The mission of the ACC Equine Training and Management Program is to educate students in the methods and subtleties of horse training in the Spanish California/Nevada tradition. This method, which emphasizes the welfare of the horse, teaches patience and practice in both the trainer and the horse. In addition to horse training, students learn horse anatomy, equine pharmacology, breeds and breeding, barn and pasture management, hoof care and many other facets of the health and maintenance of horses. Completion of the classes and/or trainer certification prepare the individual for a career in the Equine Industry.
