OVERVIEW

Better Equine Health, Nature's Way Balanced Eco Solutions has offered a holistic non-invasive approach to treating sarcoids and melanomas. Our treatment program is different than traditional in that we treat both the sarcoid and associated Papillomavirus. Because we treat both topically and internally we have an 85%-90% success rate. Each sarcoid case is treated individually. None of the topical salves have caustic properties that cause burning or any discomfort.nnMineral Balancing Therapy - Using an Equine Hair & Mineral Analysis we receive a comprehensive analysis of 15 nutritional elements, 8 toxic metals, 7 significant mineral ratios, 9 toxic ratios, and an additional 15 elements of your horse. Based on the analysis and your current feed program and training schedule our equine nutritionist can develop a custom mineral supplement specifically for your horse.
