OVERVIEW

Eco GreenGrid your mud control solution. Eliminates mud erosion control and provides ground stabilization. Creates a water permeable surface maintenance free, resistant to chemicals, and long lasting environmentally friendly. This tough, durable, interlocking grid system designed to provide turf protection, ground reinforcement and erosion control. Client comments: Eco Greengrid has been a time saver for our place. Every year our paddocks would turn into mud pits after the first rain. This year after install Eco GreenGrid we have had no mud. The horses feet are much healthier. The stalls are easier to clean and take an enormously less amount of time clean them, it is a great product and you be a fool not to give them a try. - Raye Lochert My first time using the product - this stuff is amazing! It's going to save the new paddock and round pen we are putting in behind our barn...
