#### OVERVIEW

With the help of our equine partners we at Full Circle Equine Rehabilitation Center (FCERC) strive to build the awareness of one beings ability to change the life of another. Choosing to "Join our Circle" provides an opportunity to experience that one person can effect change by the choices they make. Providing a safe and nurturing environment where people and horses can find sanctuary and interact is the purpose of our organization. Helping these amazing animals by providing them with the love and care they deserve will change the lives of their benefactors forever. Developing the skills necessary to interact safely and respectfully with the horses and people in our program empowers participants with confidence as they learn more about themselves and improve their communication skills. Horses are mirrors of our emotions and can sense our true intentions, they help us develop awareness, patience and empathy towards others. Full Circle...
