OVERVIEW

At Grace Therapeutic Horse Program we specialize in working with post-addiction teens and young adults who have struggled with addiction on many different levels. Horse therapy is also a key to healing the heart of the sexually and physically abused individual, without interfering with the progress of the person. Horses can teach and mentor an individual, as they maneuver through their journey of abuse according to the timeline of the individual, without pushing or demanding progress. *Equine Therapy Programs>Addictions|Equine Therapy Programs>Equine Facilitated Mental Health|Volunteer Opportunities
