[Snohomish, Washington](#)

#### OVERVIEW

You'll learn accurate, relevant hoof science, the importance of a heel first landing, determining where breakover really belongs, what the pivot point for forward movement means to your horse, how to identify distortion, and then how to correctly trim the foot, what shoe to use and why, the anatomy of the lower limb, how it is designed to function, how to properly shape shoes, and how to communicate all this to your client. See our website for details. School|College>Farrier
