OVERVIEW

Performance Horse is a massage practice dedicated to and focused on helping performance horses obtain their highest level of competition. Horses are just like us, they have jobs and daily activities that can cause muscles to become tight and cause pain. Repetitive motion or standing in a stall can reduce the range of motion in the horse's body. Kristi can also assist you, with knowledge of how our bodies work and how massage therapy can help heal them. [Alternative|Integrative Medicine>Practitioner](#)
