OVERVIEW

ProPanel Inc, designed the original 3 in 1 horse feeder in 1987. Our feeder is endorsed and used by more World Champions, horse professionals, veterinary clinics and equine universities than any other feeder in the country. Our unique design allows horses to eat in the natural grazing position so they do not pull the hay out of the feeder and onto the ground.See our website and Facebook page for additional details and to locate a dealer near you.Feeders|Slow Feeders
