OVERVIEW

Rugged Flooring is a ground rubber flooring system, installed by our floor technician that provides several different uses. Horse, livestock trailer, stalls, barns and wash racks. Rugged Flooring is designed to replace your traditional rubber floor mats and eliminate the need for wood shavings in your horse trailer with a non-slip, nearly indestructible surface. A big advantage is the cushion benefit in horse trailers. As the miles roll by your horse experiences less vibration and stress to their hooves, limbs and body. Allowing them to arrive in better condition than with traditional rubber mats. See our Facebook page for more details and photos.
