OVERVIEW

At Red Wagon Farm we breed mainly Dutch Warmbloods for Dressage. It is our goal to raise healthy, sane sporthorses. Red Wagon Farm was established in 2006 on 50 acres in the scenic Skagit Valley in Washington State. Our interest is breeding Dutch Warmbloods for dressage but sometimes our horses excel in other disciplines. We produce 3-5 foals year which occasionally sell as foals but we prefer to sell them once they are under saddle. See our website for additional information. *Breeder|Stallion>Dutch Warmblood|Breeder|Stallion>Warmblood
