#### OVERVIEW

Sarvey Wildlife Care Center's mission is rescue, rehabilitate, and release. Injured, ill, and orphaned wildlife are brought to us for care. Our primary purpose is to help our wildlife population by treating injured and orphaned animals. We provide immediate medical attention, food, and shelter for these animals until they are ready for release. We also provide education programs to schools and organizations. Our education team handle a number of our non releasable birds of prey. These animals and our team can come to your school or event. Contact us for more information and to make a reservation. We have been rescuing, rehabilitating, and releasing wildlife since 1981. Visit our website for information about our organization, to make a donation, or for help with injured or orphaned animals. Sarvey Wildlife Care Center is a 501(c)3 non profit organization located in Arlington, Washington in Snohomish County. Click here to view our...
