OVERVIEW

Advanced Equine CT Imaging, Sports Medicine and Reproduction Summit Equine provides advanced equine veterinary services from its Gervais, Oregon facility, serving horse owners and referring veterinarians throughout the Pacific Northwest. The practice specializes in advanced diagnostic imaging, sports medicine and reproduction, with a commitment to providing the latest treatment options while keeping clients informed throughout their horse's care. Summit Equine's advanced CT imaging provides detailed 3D views of bone and soft tissue with scans completed in minutes. Standing CT scans are available for the head, feet, knees, hocks and suspensory ligaments. Stifle diagnostics and full-neck scans through T1/T2 can also be performed under general anesthesia. Appointments are available for both current patients and veterinary referrals. Additional services include lameness and pre-purchase examinations, digital radiography, ultrasound, regenerative therapies, acupuncture, breeding management, embryo transfer, oocyte aspiration and stallion services.
