OVERVIEW

At Talking Horse Equine Bodywork, we specialize in comprehensive equine wellness services, combining massage therapy, PEMF (Pulsed Electromagnetic Field Therapy), Kinesiology Taping (KT Tape), and Low-Level Laser Therapy (LLLT) to enhance your horse's comfort, performance, and recovery. With a focus on biomechanics, injury prevention, and mobility support, we work with a variety of horses, from retired athletes to active competitors, ensuring they feel and perform at their best. Every session includes a personalized assessment and detailed session report, so owners and trainers can stay informed on their horse's progress. Whether your horse needs targeted therapy for soreness and stiffness, or routine maintenance for overall well-being, Talking Horse Equine Bodywork is committed to helping them move, feel, and perform better.
