OVERVIEW

The Oldenburg Horse Breeders' Society follows the strict standards for licensing and approval of breeding stallions established by the Oldenburg Verband in Germany. The goal of the Verband/Society is to breed top horses for sport, and the stallions approved for breeding are a critical factor. Please see links on the right side to learn more about the licensing and approval process, and be sure to browse through the directory and E-Book of licensed and approved stallions.Assoc|Breed Registries
