OVERVIEW

Since keeping hooves sound and healthy is my goal, I do what is right for that horse, and I enjoy teaming up with other farriers to achieve that goal. As part of my effort to help horses have sound and healthy hooves, I know how to treat common hoof ailments, but I also do rehabilitation. I have extensive experience with founder, navicular, abscesses, white line disease, retracted soles, under run heels and club feet. I also have experience with foals, as well as older and arthritic horses. As part of my rehabilitation work, I do glue on composite shoes, but I also do the glue-ons for maintenance when needed. I have a strong commitment to continuing education and continually work to better myself and increase my knowledge
