OVERVIEW

The TurtleNeck® concept was developed to provide a more comfortable fitting for the many unique shapes of horses. Our elastic neckline conforms to the shape of the horse and comfortably snugs up to keep the blanket from shifting. Once it is secured it stays in position while stretching in and out as the horse moves. We offer a variety of blankets and sheets. Our brand is now recognized by many horse owners and retailers as being uniquely superior product.*Blanket & Related>Blankets for Sale New/Used|Fly|Pest Control
