OVERVIEW

Customized bodywork to enhance your horse's performance and well-being. Well Structured Equine is a body work practice based on the Equine Natural Movement Series (ENMS). Practitioners work with their hands and their heart to deliver a series of Structural Integration (SI) sessions that help return the horse's body to its ideal balanced state. These sessions restructure and realign the body so the horse regains flexibility, fluidly and ease of movement. Alternative|Integrative Medicine>Practitioner
